

在中国汽车公司实施的Clay Model 的Design Review变更的提案实例

The image displays four technical proposal forms for part assembly changes, arranged in a 2x2 grid. Each form includes a title '零件工艺变更要求表' (The requirement of part modification), a table for part information, and two main sections: '关键及问题点 guideline' (Key points and guidelines) and '对装及测量事项MEASUREMENT' (Assembly and measurement matters). The forms contain various diagrams, including cross-sections and perspective views of automotive parts, with annotations in Chinese and English. A prominent yellow callout box is overlaid on the forms, containing the text: '在此展示的实例主要是指出总装生产技术上的问题。' (The examples shown here mainly point out problems in the total assembly production technology.)
